## GETTING STARTED

### CAREER MODE OPTIONS

You can choose from three career modes, which changes the difficulty by mainly influencing your financial situation, but also affects certain gameplay elements.

#### New Farmer

You start with a good selection of machines, you already own some land and money should not be your main concern. Recommended for absolute beginners.

#### Farm Manager

In this mode, you start with nothing but a good amount of money to customize your fleet and farmland. Be aware of the loan that you have to pay back!

#### Start from Scratch

You are left with little to no money, and you might need to help out with some contractor work before you can afford your own farmland and machines. Work your way up!

### MAPS

Farming Simulator 22 comes with three environments for you to play in:

#### Erlengrat

A lovely little town embedded within the Alpine mountains.

#### Elmcreek

The American Midwest is calling with large fields and places to explore!

#### Haut-Beyleron

A historic Mediterranean region dominated by a large river.

## HUD - HEADS UP DISPLAY

#### 1 Help Menu

Shows the currently possible actions for the selected machine.

#### 2 Control Group display

Indicates the status of your current tools and / or vehicles.

#### 3 Weather, Time and Money

Displays the current and upcoming weather, the time and timescale, as well as your current account balance.

#### 4 Notifications

Notifications about AI workers, your expenses and incomes.

#### 5 Mini-Map

Shows the local area and field information.

#### 6 Attachable objects

This only appears when you are close to an attachable object.

#### 7 Fill Level

Here you can see how much of a certain fuel type is in your machine or tool.

#### 8 Speedometer

Information about your current speed, the current cruise control speed and the vehicle's working hours.

#### 9 Fuel and Condition

Displays the fuel level and condition of your machine.

#### 10 Gears

Displays the selected gear and gear group. Play with automatic or use manual transmission and shift gears yourself.

#### 11 Crosshair (on foot only)

Indicates the center of the screen. Used to grab objects or point at fields, machines, etc. to see more information.

## FARMING BASICS

There is a lot to keep in mind when operating a farm. First, you decide what to focus on. There are three main activities that you can pursue in the game.

### Arable farming

Work fields, harvest crops, and process/sell them.

### Animal husbandry

Tend to animals and sell their products.

### Forestry

Plant and cut trees to sell them for profit.

## ARABLE FARMING

In Farming Simulator 22 there are 16 different crops. You need to keep in mind the special requirements for each type.

**Grains:** Wheat, Barley, Oat, Canola, Soybeans, Sorghum, Sunflowers and Corn

Use a cultivator attached to a tractor to loosen the soil. Plant seeds with either a seeder or planter. Once the field is ready for harvest, you can use a combine harvester with the appropriate header attached to it to harvest the field.

**Root Crops:** Potatoes and Sugar Beets

Growing potatoes and sugar beets requires special planters and harvesters. For potatoes, you can use potatoes from previous harvests to fill up the planter. To harvest these crops, you first have to remove the foliage with a haulm cutter, and then dig them up with a potato or sugar beet harvester. The easiest and fastest (but more expensive) way to do this is to use a self-propelled harvester. A cheaper alternative is to use a tractor with several specialized tools.

**Special Crops:** Grapes and Olives

Grape vines and olive groves need to be planted in rows. Use the build mode to place the plants. Once grown, harvest your olives or grapes with specialized harvesters and take them to your production points or sell them right away. Remember to prune your grape vines after the harvest so they can grow back.

**Special Crop:** Sugarcane

To plant sugarcane, you need a billet planter filled with pallets of sugarcane bought from the store or sugarcane from a previous harvest. Since sugarcane harvesters don't have tanks, you'll need to attach a trailer to it if possible or hire a worker to drive the harvester while you drive alongside it with a tractor and a trailer attached. Harvested sugarcane will regrow and does not have to be planted again.

**Special Crop:** Cotton

Harvesting cotton requires a specialized cotton harvester. It turns the cotton into bales that can only be transported on a special cotton trailer. Just like sugarcane, cotton plants will regrow.

## ANIMAL HUSBANDRIES

If you want to take a break from harvesting, or focus on other tasks, you can take care of animals: horses, cows, sheep, pigs, chicken and bees. Each of them have specific needs and reward you in different ways.

**Purchase & Transport**

First, you need to buy an animal pen and place it via the build mode menu. Then, you can purchase animals from your local animal dealer. Most of them are transported in a livestock trailer.

## Animal Care

You have to take care of your animals by feeding them, supplying them with water and straw for bedding by using a straw blower. If you have purchased an animal barn, they are automatically supplied with water. When cows, sheep, pigs and chicken are happy and old enough, they reproduce, and new animals are added to your animal population.

### Chicken

- **Food:** Wheat, Barley, Sorghum
- **Product:** Eggs

Chicken produce pallets of eggs, appearing next to the chicken coop. Put them in your vehicle with a forklift and sell them or deliver them to your production buildings.

### Horses

- **Food:** Hay, Oat, Sorghum
- **Product:** Trained Horses

Horses are trained and then sold for a profit. Each horse has an individual fitness level. Ride your horses to train them and increase their value. They require straw bedding and water. And, don't forget to brush them! You can even give them custom names!

### Sheep

- **Food:** Grass, Hay
- **Product:** Wool

Sheep produce wool. In order to sell the wool, you have to grab the pallet at the sheep pasture with a pallet fork and transport it to the local spinners. You can also deliver the wool to your own production point for further processing.

### Pigs

- **Food:** Almost everything
- **Product:** Pigs, Slurry, Manure

Pigs can eat corn, wheat, barley, soybeans, canola, sunflowers, potatoes, and sugar beets. Like cows, they produce slurry and manure when they're fed. Collect it in a slurry tank and use it as a fertilizer.

### Cows

- **Food:** Grass, Hay, Silage, Total Mixed Ration (TMR)
  - **Product:** Milk, Slurry, Manure
- Your cows always produce milk, but you can improve their productivity by feeding them better food. You can also sell cows for profit. The best food for your cows is Total Mixed Ration (TMR).

### Bees

- **Food:** -
- **Product:** Honey

Beehives placed via the build menu produce honey, which can be processed further or sold directly. Place your beehives next to fields, and you will soon be living in the land of milk and honey, as the bees will increase the yield of canola, sunflower and potato crops. Honey will be delivered to the freely placeable delivery area.

## FORESTRY

Selling wood is a profitable business. You can cut down trees with a chainsaw or a tree harvester. They should be de-branched and cut into logs before they're sold.

### Trees & Poplar

You can harvest trees & poplar to produce logs and wood chips. New trees need to be planted with a special tree sapling planting machine. The shop can provide you with seedling pallets.

### Selling Wood

Logs can be delivered and sold to the sawmill or further processed at a factory. The price of wood not only depends on the length, but also on the straightness of the delivered pieces. Small, bent pieces will generally sell for less. You can also chop them up with a wood chipper to make wood chips and deliver them to the sawmill.

## FARMER'S KNOWLEDGE

### START FARMING

#### Cultivating

Use a plow, cultivator, disc harrow, power harrow, subsoiler, or spader to aerate the ground before you start sowing your crops.

#### Sowing

Sow crops using a seeder or a planter. Fill the machine with seeds from a pallet or silo first. Select the crop you want to sow. Lower the machine and turn it on. Seed pallets can be purchased at the shop.

#### Harvesting

Your crops grow with time. You can check the growth by standing next to the field or by checking the overview map. Once they're ready to harvest, use a combine harvester with the appropriate header attached.

**Hint:** The pack section in the shop will help you find the right machines to start with certain activities.

#### Transporting

If the combine's tank is full, you can unload it into a trailer. Transport it to a selling point, factory, or put it into storage to sell it later. When transporting large objects like tree trunks or bales, it is important to secure your cargo with tension belts.

#### Storing

You can store your crops in a silo to sell later. Silos can be placed on your farmland via the build mode menu.

#### Hiring a Worker

Need help on your farm? Hire a helping hand to assist you with specific tasks by pressing the helper button. They can harvest a field, for example, or cultivate after a harvest. Of course, the worker expects a wage, which is automatically deducted from your bank account.

**Hint:** Some seeders and planters have an integrated solid fertilizer tank. You can make use of this and reduce the amount of times you would have to drive over the field.

## IMPROVING YIELD

Let's optimize your work! The more you improve your fields, the higher the yield. Visit the overview map and switch to "Soil composition" to get an overview of what your fields need.

### Periodic Plowing

You should plow a field after harvesting corn, potatoes or sugar beets and when replacing your sugarcane with a different crop. These plants have deep roots and would cost reduce your yield.

### Liquid/Solid Fertilizer

Liquid and solid fertilizer can be bought as pallets or Bigbags from the shop. Use a sprayer for liquid fertilizer and a fertilizer spreader for the solid fertilizer. You should fertilize your growing crops twice before they are fully grown. Fertilizers increase your yield each time.

### Slurry, Manure, Digestate

These natural fertilizers can be used instead of liquid/solid fertilizer. Both slurry and manure can be obtained from cows or pigs. Slurry is spread with a slurry tank, while manure requires a manure spreader. Digestate is spread with a slurry tank and can be obtained at the biogas plant.

### Lime

Lime increases your yield. It should be applied after every third harvest. Use a lime spreader to apply lime to your field.

### Catch Crops

Oilseed Radish is a catch crop that is used as a fertilizer instead of being harvested. Once the plants are visible on the field, use a cultivator to dig them in. It will increase the yield of the following harvest.

### Weeds

Together with your crop sprouts, weeds will show up. If you don't remove them, your yield will suffer a loss. Remove the weeds with a weeder, if they are still near the ground level. Once they've grown too large, you can only get rid of them by spraying herbicide.

### Stones

When cultivating and plowing your fields, stones can be dug up. When driving over them, your tools and vehicles can get damaged. Smaller stones can be removed with a roller, while bigger stones need to be collected. Use a stone picker to collect the stones from your fields and sell them at the debris crusher.

## PURCHASING LAND

You can buy new land for growing crops and more in the map menu. You can also sell land you own if necessary. You cannot work, mow grass, or cut trees on someone else's land unless you are doing contract work.

### Create & extend fields

You can use a plow to create new fields on land you own. This way, you can also enlarge your fields, or even combine them. Especially in the beginning, when you do not have large amounts of money, it is a good decision to buy smaller fields in close proximity, and combine them later to create even bigger fields.

## ANIMAL SUPPLY

### Grass and Hay

Most of the animals need grass. A mower is required to cut the grass. You can plant it on a field or mow the meadows all around to gather some. If you want to make hay, you have to turn the grass with a tedder, so it dries. Arrange the grass or hay with a windrower into swaths for easier collection. You can pick up the grass or hay with a loading wagon or a baler.

### Straw

Straw can be obtained after harvesting a field of wheat, barley or oat. Just collect the swath with a baler or loading wagon.

### Bales

Bales can be automatically loaded with a bale collector. A cheaper but more work-intensive investment would be a tractor with a front loader configuration and a bale fork.

### Chaff

Chaff consists of crops chopped by a forage harvester. You can make chaff from corn, wheat, barley, oat, or canola. Use the appropriate header for the crop while driving over it with the forage harvester. Unlike combine harvesters, forage harvesters have no tank and need to be accompanied by a tractor with a trailer.

### Water

Water is transported with a water trailer. You can get water from a lake or from a water tank that can be placed from the build mode menu.

### Silage

Silage is a necessary fodder for cows and can be made from chaff or grass. There are two ways to create it. Option one is to dump chaff or grass into a bunker silo and drive over the heap to compress it. Cover it, and wait for the fermentation process to finish. Option two is to use a baler. Create a bale of grass, and use a bale wrapper to start fermentation.

### Total Mixed Ration (TMR)

You can optimize your cows' milk production by feeding them TMR. TMR is produced by mixing together hay, straw, silage, and concentrate in a mixer wagon.

## SEASONAL FARMING

Farming Simulator 22 introduces seasonal cycles. Spring, summer, fall, and winter come with their individual atmosphere and change the gameplay throughout the year.

### Crop calendar

The seasonal crop calendar impacts the time-frame you are able to plant and harvest your crops. Keep in mind that prices fluctuate depending on the time of year. You can deactivate 'seasonal growth', allowing you to plant and harvest anytime.

## Weather

The weather forecast affects your decisions. Keep in mind: While there is snow or rain, you cannot harvest your crops and will have to wait until it stops. Keep an eye on the weather forecast icon in the top right corner, implicating the impending change of the weather.

## Snow

When snow covers the land and your farm, you need to be wary of slippery roads. Better get your winter equipment ready as the handling of your vehicles will be affected. Snow can be toggled on and off in the game settings.

## BUILD MODE MENU

Create the farm of your dreams using the build mode menu! There are various categories available to customize your farmlands in different ways.

**Buildings** includes sheds, silos, silo extensions, containers, and tools.

**Production** contains all the buildings needed to earn you additional money. There are factories, selling points, greenhouses, orchards and generators.

**Animals** contains all the pens for your animals - in different shapes, sizes, and some additional functionality.

**Decoration** contains fences, (street) lights and more. With this set of items, you can provide your farm with a lot of details.

**Landscaping** contains tools for sculpting, painting, trees, and plants. Here you find everything to make your farmland more unique.

## FINANCES & MAKING MONEY

### FINANCIALS & LOANS

On the finance screen, you can see all income and expenditures for the current month and the previous four months. Any loan you have taken from the bank is also displayed here.

If you need more money urgently, you can take on additional loans from the bank. However, at the end of each month, you will have to pay any excess interest on the loans. Pay them back as fast as you can to save on interest.

### SELLING PRODUCTS

To sell your products, you need to load them onto a trailer and drive to one of the selling points marked on the map. Open the prices window to see what each station accepts and at what price. Ideally, you want to sell your products at the highest paying selling point. The prices vary and change over time - depending on the season, for example. You can influence prices by deciding what you want to put up for sale and how much of it. You can sell crops, wood, animals, their produce, and processed goods.

### CONTRACTS

There are other farms on the map, which are owned by other farmers, unless you buy the fields from them. They're always in need of assistance. On the contract screen in the menu, you will find different jobs.

### GREENHOUSES

Greenhouses earn you additional income. You can grow lettuce, tomatoes, and strawberries. These goods can be sold at different selling points or processed further. You can place a supplementary water tank next to your greenhouse to increase the water capacity, as your plants in the greenhouses must be provided with fresh water.

## GENERATORS

Solar collectors and wind energy converters have high initial costs, but they produce passive hourly income. Place them on your farm with the build mode.

## FACTORIES & PRODUCTION CHAINS

An additional option to selling your products are the factories. Either visit the local factories or build your own via the build menu. At the factories, you can process your product further to increase the selling price of the end product. This can be sold at selling points.

**Bakery:**  
Bread, Cake

**Grain Mill:**  
Flour

**Sugar Mill:**  
Sugar

**Grape Processing:**  
Grape Juice, Raisins

**Carpentry:**  
Furniture, Woodchips

**Saw Mill:**  
Planks

**Tailor Shop:**  
Clothing

**Oil Mill:**  
Olive Oil, Sunflower Oil, Canola Oil

**Dairy:**  
Cheese, Butter

**Spinnery:**  
Cloth

**Cereal Factory:**  
Cereal

## VEHICLES, MACHINES & TOOLS

### BUYING & LEASING

You can purchase new vehicles and tools from the vehicle shop. Equipment is divided into categories or brands. If there is a suggested combination for the vehicle or tool, you can select this with a simple button press.

You also have the possibility to lease vehicles and tools. You will be asked to pay a starting fee and a continued leasing fee. Also, keep an eye on the 'used vehicle sale'. You can find great offers on all kinds of tools and vehicles for reduced prices.

### VEHICLE CUSTOMIZATION

Some vehicles allow for additional customization, such as different wheels, a more powerful engine, a different color, or adding a front loader attachment. Customizable vehicles can be adjusted to your liking when bought. To customize them later, bring the vehicle to the marked area in front of the machinery dealer, then interact with the shop symbol.

### VEHICLE & MACHINE REPAIR

Over time, your vehicles and tools will deteriorate. Vehicles in need of repair lose speed or engine power. Take the vehicle to the machinery dealer or to your vehicle workshop to pay for repairs. To fix traces of use in the paintwork, repaint your vehicle.

### GARAGE

You will see all the vehicles you currently own in the garage section. All of your assets are listed here, and you can sell them directly from this menu. Their current value depends on their age and usage. Selling them at the machinery dealer instead grants you a bonus on the selling price.

## Shop Icons

**Power:** Shows the vehicle's minimum engine power

**Required Power:** Shows the required engine power to operate the tool properly

**Transmission:** Shows the vehicle's transmission type

**Speed:** Shows the maximum speed the vehicle can achieve

**Working Speed:** Shows the maximum speed when working with the vehicle/tool

**Fuel:** Shows the fuel tank capacity or electric charge capacity

**Weight:** Shows how heavy the vehicle/tool is

**Max Fill Weight:** Shows the recommended maximum fill weight for the tool

**Width:** Shows the working width of the vehicle/tool

**Fill Type:** Shows what the vehicle/tool can transport or process

**Bales:** Shows the type and size of bales the tool can transport or create

**Seeds:** Shows the type of crops the tool can sow

**Animals:** Shows which type and the amount of animals the trailer can transport

**Slots:** Shows how many slots the machine occupies when bought

## Garage Icons

**Operating Hours:** Shows the operating hours of the vehicle/tool

**Age:** Shows how many months you have owned the vehicle/tool

**Wheel Type:** Shows which wheels are equipped on the vehicle/tool

**License Plate:** Shows the license plate of the vehicle/tool

**Condition:** Shows the overall condition of your vehicle/tool

## MULTIPLAYER & MODS

In Farming Simulator 22, you can manage your farm together with friends or like-minded farmers from all around the world. You can also customize your experience with a multitude of free user created content, called mods.

### MULTIPLAYER

Either work a farm together, or manage your individual farms while helping each other out. An internet connection, a paid-for PlayStation®Plus subscription (sold separately) and an account for PlayStation™Network are required. Cross-platform multiplayer is supported by most systems.

#### Join game

Here, you see a list of currently existing games you can join. If the game is running with mods, you need to install them as well. The mods are listed in the game details.

#### Create game

Create your own game session others can join. First, you select a save game, difficulty, and map. Your already existing career save game can be used, too. You can then adjust additional settings, like the maximum number of players or mods used.

### Multiplayer options

If you open the menu, there are a variety of multiplayer options to manage the way you play with others: You can give your fellow players various permissions to buy and sell machines, fields, or start contracts and more.

### Banning players

Is one of your fellow players misbehaving? The server admin can ban a player from the game by accessing the players list.

### More info

Need help or more info about multiplayer games in Farming Simulator 22?

Visit [farming-simulator.com/support](https://farming-simulator.com/support) for help and further information.

## MODIFICATIONS (MODS)

Mods are extensions for Farming Simulator. They are usually created by fans of the game, adding new content to the game such as machines, maps and even gameplay mechanics. Visit the official ModHub to download all kinds of mods, tested and curated by GIANTS Software.

Visit <https://farming-simulator.com/support> for further information.

### Adding mods

Go to the main menu of the game and select "Downloadable Content". You can browse the categories of our ModHub to find your preferred content.

### Creating your own mods

Creating mods for Farming Simulator 22 is fairly easy. If you're new to mod creation, visit [gdn.giants-software.com](https://gdn.giants-software.com) to find documentation, tutorials, a dedicated mod forum and more to get you started.

# Farming Simulator 22

## PLATINUM EXPANSION

## WELCOME TO SILVERRUN FOREST!

The Platinum Expansion adds a whole new and lush environment to Farming Simulator 22: Silverrun Forest. Inspired by the Pacific Northwest with its vast and woody landscapes, the map offers many possibilities with new forestry missions, tree types, and production chains. Although you can tend to agriculture and animal husbandry, the focus lies on forestry.

## A NEW RESOURCE!

### Iron Ore

Collect iron ore at the mine shaft and deliver it to the iron furnace to refine it. With the metal produced at the furnace, you can supply various factories to manufacture all kinds of goods.

## FACTORIES & PRODUCTION CHAINS

Silverrun Forest is the home of many new factories and production buildings. Of course, they focus on the production of wooden objects after you provide them with the required resources. Then, you can start producing barrels, tables, even birdhouses, and much more.

### Barrel Factory:

Barrels, Buckets, Bathtubs

### Fancy Furniture Factory:

Armoire, Chairs, Tables

### Flooring Factory:

Floor tiles

### Iron Furnace:

Metal

### Paper Factory:

Cartonrolls, Paperrolls

### Pet Accessoires Factory:

Birdhouses, Cattrees, Doghouses

### Picture Frame Factory:

Picture Frames, Easel

### Sawmill:

Woodchips, Prefabwalls, Woodbeams, Planks

### Shingle Factory:

Shingles

### Wood Turner:

Staircase Railings, Peppergrinders, Bowls

## CONSTRUCTION PROJECTS

In Silverrun Forest, you will find big construction projects - and you can help! Only by delivering various resources, will the construction proceed.

### Roller Coaster

The construction requires prefab walls, metal, floor tiles, planks, wooden beams, chairs, barrels, buckets, and other materials. Deliver these resources, so it gets built. Once the construction is completed, be sure to book a ride!

### Boatyard

The boatyard requires wood beams, planks, floor tiles, metal, and fabric to build boats. Once a boat is finished after delivering enough resources, it will launch into the lake - and you get paid for your help, of course.

## PRODUCTION BUILDINGS

Silverrun Forest may consist of dense forests and wild nature, but there are resident businesses and production plants you can visit, or even purchase and own yourself.

### Mine Shaft

The mine shaft expands your production chains. It collects iron ore in a heap that you can gather and refine at an iron furnace. With the produced metal, various goods can be manufactured at other production buildings or delivered to construction projects like the roller coaster.

### Sawmills

There is a sawmill in the south that buys your logs and can sell you some products. You can't purchase and own this one, though. Up in the north, you will find the 'Old Sawmill' - here you can purchase the building to produce various goods by starting production chains.

## MACHINES & TOOLS

With the Platinum Expansion, over 40 new machines, including new brands, are introduced. Volvo, IMPEX, John Deere, Koller, Komatsu, Pfanzelt, Schwarzmüller, and other brands are featured. Let's take a look at the most important and unique additions.

### Hydraulic Breaker

All over Silverrun Forest and its hilly landscape, there are mighty boulders embedded in the ground. With the hydraulic breaker, you can crush rocks on your farmland. Collect and sell them at the debris crusher.

### Tree marking spray

Fell or preserve? Mark trees with the new tree marking spray to indicate whether you or your friends in multiplayer should chop them down. Different colors and icons are available to mark trees. When accepting corresponding missions, some trees are already marked. Be careful to cut down only the trees you are supposed to!

### Yarder

Use the yarder to conveniently transport your logs: By attaching the yarder to a suitable tractor in an appropriate spot with enough space available, and a massive tree at the other end, you connect two points in Silverrun Forest. A carriage between the two points transports logs over great distances and otherwise impassable terrain.

### Winches

Winches help you to transport logs by dragging them. This is especially helpful on steep terrain. By attaching a winch to your tractor, you can connect its tear-resistant wire rope to trees you cut down and drag them to their destination.

## FORESTRY MISSIONS

Since forestry shapes this region and its landscape, there are even more missions you can accept to help your neighbors.

### Deadwood Missions

Neighboring landowners will hire you to cut down dead trees on their land. Once the mission is accepted, an area where you can find the dead trees will be marked on the map. Only cut down the trees marked with an exclamation point! Otherwise, you will be penalized. You can sell the trees you chopped down and get some additional money.

### Delivery Missions

Transporting logs in a steep environment full of hills and valleys is challenging - and fun! Since your fellow landowners don't find the time to do it themselves, they will ask you for help. Offering you payment, of course.

# Farming Simulator 22

**PREMIUM EXPANSION**

## WELCOME TO ZIELONKA!

Zielonka invites you to cultivate an agricultural empire in a brand-new Central European environment – expressing the flair of Germany's neighbors by drawing inspiration from countries like Poland and the Czech Republic. Not only does it offer a picturesque landscape around a remote and quaint village, it also has fertile ground to cultivate the new vegetable crops.

## VEGETABLE CROPS

### Carrots, Parsnips & Red Beet

With the Premium Expansion, you can plant brand-new vegetable crops – carrots, parsnips, and red beet. Not only in Zielonka, but wherever your farming operation is at home. All of them require you to create ridges before planting and take four months to grow.

Sell the harvest or deliver it to factories like the soup or preserved food factory to be processed further – that earns you additional income!

## CONSTRUCTION PROJECT

Zielonka is not only known for its fresh vegetables, but also for its export of cultural craftsmanship, exemplified by the creation of elegant and timeless pianos. And you can help by supporting this local business with resources to get the classical keyboard instruments built!

### Piano Factory

Construction of pianos requires wooden planks. Harvest wood from nearby forests or trees planted by yourself, and deliver them to the sawmill to produce planks. As pianos are quite valuable, you should guarantee a steady supply of wooden planks.

## PRODUCTION BUILDINGS

Adding to the charm of the region, are the resident, traditional businesses in Zielonka. All of them reward you with increased income for delivering produce.

### Soup Factory

The beloved "Zup, Zup, Zup" specializes in liquid food and asks you to deliver fresh vegetables to produce nutritious soups.

### Preserved Food Factory

Preserving food is the entire business of the preserved food factory. Deliver the produce, so they can make canned goods.

### Potato Processing Plant

Here is where the potato is transformed into crispy potato chips – the ultimate result of its journey – so, get the potato party started and profit from it!

## MACHINES & TOOLS

With the Premium Expansion, over 35 new machines, including new brands, are introduced. Dewulf, Gorenc, Agrio & WIFO debut in the series, while BEDNAR, Fiat, GRIMME, Kverneland, SaMASZ and other brands are also featured. In addition to the machines and tools, there are of course various new placeables, decorations and other items. Let's take a look at the most important and unique machines that extend the gameplay:

### Rotary Hillers

To meet the requirements of the new crops, you operate specialized machines to sow, harvest, and transport. Before sowing, you have to prepare the seedbed for vegetable cultivation and create large-volume ridges with rotary hillers!

Use the GRIMME GF 400 & GF 800 to create those ridges, then plant the crops with the Kverneland Miniair Nova series, and harvest them with self-propelled and towed harvesters by Dewulf before using WIFO equipment for transport!

### Vegetable Harvesters

There are multiple new harvesters by Dewulf, specialized on vegetables, to harvest carrots, parsnips, or red beet. Depending on your budget and operation, you can choose between different dimensions.

While the Dewulf P3CL Profi is a mounted 1-row top lifting harvester with hydraulic box lift to unload the harvest directly into boxes, the Dewulf ZKIVSE is a self-propelled 4-row top lifting harvester, equipped with a discharge elevator to unload into trailers – highly efficient, if you can afford it. Check out the machines at the dealership to find the best one for your farm!

### COLLECTIBLES

All over Zielonka and its surroundings, golden apples are hidden. Find them, and they will be collected in the town's center. Of course, every found apple earns you a cash reward, too.

## FARMING SIMULATOR ACADEMY

Need more information to get you started in Farming Simulator 22? Check the in-game help section or find even more guidance in our Farming Simulator Academy - with a growing set of tutorials, we explain in detail how to get started if you're new to (virtual) farming.

Visit [farming-simulator.com/academy](https://farming-simulator.com/academy) and you'll be a top-notch farmer in no time!
